REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a system and method, which statistically determines when regularly occurring interference events of a predictable duration will occur. A search of prior art records has fail to teach or suggest, alone or in combination"

"an automatic gain control system comprising: means for tabulating statistical information about periodicity and duration of RF interference; and means operable, at least in part, to certain tabulated statistics for directing the gain said gain control system" as disclosed in claim 1.

" a method for operating a gain control circuit, said method comprising the steps of: gathering statistical information about periodicity and duration of RF interference; directing the gain of said control circuit under at least partial control of said gathered statistical information to mitigate effects of said interference" as disclosed in claim 13.

Nor the prior art teach:

"a circuit for an RF data transmission system, said circuit comprising: a digital delay stage delaying incoming RF data signals and outputting delayed IF signals; a variable gain stage receiving said delayed IF signals and outputting gain adjusted IF signals to a demodulator for said system; means for monitoring RF interference, means for gathering statistical information about periodicity and duration of said RF interference; and means for controlling said variable gain stage in response to said gathered statistical information to adjust gain of said delayed IF signals mitigating effects of said RF interference on said signals" as disclosed in claim 20.

Art Unit: 2611

The prior art also fails to teach a circuit for an RF data transmission system, said circuit comprising a digital delay stage delaying incoming RF signals and outputting delayed IF signals; a variable gain stage receiving said delayed IF signals and outputting gain adjusted IF signals to a demodulator for said system; a statistics gathering engine collecting periodicity, duration and strength information about RF interference; and a response stage adjusting said variable gain stage in response to said periodicity and duration information to mitigate effects of said RF interference on said signals” as disclosed in claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
